- Technical Reference: The "Fixer" Commands
  - Tasky
    - Airflow DAG for Bulk Update and Report Download
    - Curl to trigger the bulk task update DAG
    - Curl to trigger report download DAG
    - Curl to fetch list and details/status of jobs for uidx and dagId
  - Thanos: Fix Missing Task Data
  - Hermes: Template Onboarding
    - Email
    - WhatsApp
  - Nurix Voicebot: Request to download all recordings

1. Smart Assist (SA) : ayush , mahad, vaishnavi
Session: Mahad , Ayush
Hedwig & IMS: Mahad , Khushbu
UI & Accounts: vaishnavi

Issue Category	Sample Indicator (Subject /Screenshot)	How to Confirm (Diagnosis)	Steps to Fix / Resolve	POC
Session Clearance	`Assistance Required to Clear Existing Sessions: vt.42193`	Multiple agents reporting "Maximum session limit reached."	Route to Nalini for session clearance via email/chat.	Nalini Naram
Account Creation / Password Reset	`New Agent Onboarding: vt.XXXXX` or `Account not found`	Agent ID does not exist in SA database or login fails for new hire.	Verify details and route to Sipra Jena.	Sipra Jena
Login Failures	`Create session failure` in GChat or logs	Check **IMS Cockpit** or **SA ELB Dashboard** for 5xx spikes.	Redirect to Prince Kumar in GChat channel.	Prince Kumar
Auto-Allocation	`Tasks not flowing to bucket`	Logs show tasks in `UNASSIGNED` state despite active agents.	Escalation for routing logic; contact Paras.	Paras Sood
UI Rendering	*Screenshot of blank component or "Loading..." spinner*	Inspect Network Tab for `403 Forbidden` or `404` on components.	Check agent roles/permissions and entity ID.	CRM On-call
API Failure	`Incident failure: Return /Exchange`	Check Kibana logs for downstream timeout (PPS /LMS).	Trace error and raise in the specific downstream channel.	Service Lead
Task Creation	Task creation failure : due to unavailability of payment mode.	Check the return creation date. • If **> 6 Months**: Raise a manual refund ticket / Use the manual portal.	**SOP Update: Refunds for Returns > 6 Months** **Protocol:** Refunds for returns created more than **6 months ago** must be processed **manually**. Please do not attempt to process these via SA. **Reason:** Data for transactions older than 6 months is moved from **PPS (Live DB)** to **Archive (Cold Storage)**. The automated system cannot fetch this data.	Service Lead
Auto task assignment	Agents not getting tasks on automation	older session should be cleared	such issues are a part of oncall. Follow SOP and reach out on mail (herculas oncall) for such issues. Reach out to FK team, if it is not getting resolved.	cs-hercules-oncall, Tanisha (for escalation)

---

2. Tasky and Scheduler Report: Bishesh and Parth

Issue Category	Sample Indicator (Subject /Screenshot)	How to Confirm (Diagnosis)	Steps to Fix / Resolve	POC

Limit Exceeded	`Max page limit reached for report`	Check `report_config` in Thanos DB for current limit.	Raise DMS request via ODIN to increase `maxPages`.	CRM-Oncall
Tasky Download /Upload Failure	On Tasky it shows FAILED or NULL in the table	Check the Tasky DAGs on airflow for the particular Job ID https://platform-airflow.myntra.com/home?tags=tasky	1. Check the Graph to Find which particular Task in the DAG failed 2. Go through the Logs to diagnose the relevant downstream failure	CRM-Oncall
Tasky Download /Upload Stuck	On Tasky UI the jobs are stuck in QUEUED or IN_PROGRESS state	This is different from a direct job failure and is mostly caused my issues on Airflow side. Check the DAG status for the particular jobID	1. Check the Graph to find where the job is stuck 2. If a Task has been stuck for sometime in Queue you can raise it to Airflow Team	WMS raise on #myntra-airflow slack channel
Data Mismatch	`Report contains Closed tasks`	Check the task status on SA. Hit the Thanos Curl to trigger the report Hit the FK IMS curl to get the filtered results from their system If there are closed incidents in FK response it can be raised to them Both of the above curls are added in the tech reference section.	FK will need to fix. This isue arises due to loss os sync between their Yak service and elastic search	cs-ims-oncall

3. Thanos: Jidnyasa , Rounak

Issue Category	Sample Indicator (Subject/Screenshot)	How to Confirm (Diagnosis)	Steps to Fix / Resolve	POC
Cron Delay	`CC Report not received for [Date]`	Check **ODIN Cronify** for "Last Run" timestamp and failure logs.	Log into VM via Jump host; run `cat *.log` or trigger manually.	CRMOn-call
TAT Issue	`Incorrect TAT for RETURN category`	Query `incident_categories` for format: `CAT###SUB###ISSUE`.	Update the TAT values in the Thanos DB tables.	DBAdmin
Enrichment	`Missing data in Task View`	Check if specific fields (Order/Customer) are null in Thanos DB.	Trigger the **Enrichment API** (CURL) for the specific Task ID.	CRMOn-call

ISAT Issue	Zenduty Alert titled:- ISAT SURVEY METRICS Failure > 5% CRM_outage_alerts	 Check ISAT survey metrics if the failure count has increased, and also check if it has increased for a particular appClient		CRMOn-call
Pair Data not received	Pair Data not received, the cron for this is mongo_export.py	in helpcenter0-az-bcp-dr-ci, navigate to /myntra/pair, you can modify the test_script.py with your email id, if you are not receiving the mail after successful triggering, the mail server is not working	using mailq, to see the current queue. status of the mail server can be checked using sudo systemctl status postfix even if the status is active and yet mail is not there, you can restart the server using sudo systemctl restart postfix	CRMOn-call

			then you can clear the queue using sudo postfix -d ALL the email can then be triggered using python2 mongo_export.py	

4. Pair : parth and Mahad

Issue Category	Sample Indicator (Subject /Screenshot)	How to Confirm (Diagnosis)	Steps to Fix / Resolve	POC
Pair Report	`Pair report not generated`	Check cron job logs for `mongo_export.py` on Helpcenter VM.	Restart the script or investigate Mongo connectivity.	CRM On-call

5.Helpcenter: Arnav

Issue Category	Sample Indicator (Subject /Screenshot)	How to Confirm (Diagnosis)	Steps to Fix / Resolve	POC
HC Outage	`Helpcenter downtime alert`	**New Relic** showing high error rate (>5%) for HC-UI.	Enable `contactUsMessageEnable` in **Switch** tool.	CRM On-call

6. Hermes: Parth, Bishesh, Rounak

Issue Category	Sample Indicator (Subject /Screenshot)	How to Confirm (Diagnosis)	Steps to Fix / Resolve	POC

Send Grid Timeout Failures	Zenduty Alert titled:- Send Grid Email Errors > 1% in last 10 mins CRM_outage_alerts	https://grafana-k8s-ci.myntra.com/d/VT3pYyU4k/notification-hermes?orgId=1&viewPanel=108&from=1772162447205&to=1772184047206  https://grafana-k8s-ci.myntra.com/d/VT3pYyU4k/notification-hermes?orgId=1&from=1771579326101&to=1772184126101&viewPanel=76 check for "Service provider RT - SEND_GRID - EMAIL"	Raise to Product to raise to Send Grid poc	CRMOn-call

7. Redressal: Khushbu

Issue Category	Sample Indicator (Subject/Screenshot)	How to Confirm (Diagnosis)	Steps to Fix / Resolve	POC

Change in Operating Window in Helpcenter

the update needs to be done in 3 places, helpcenter and help-center switch, and in gupshup

in helpcenter ui switch (help-center)

in configUpdate, in contextualInfoConfig, in ContantUsChannelsTimings, the timings needs to be updated according to the new operating window, for all the version, v2 can be skipped as that is already for 24 hours, reference: https://paramount.myntra.com/admin/ticketDetailPage/699f3abc9c188c6afd7528ea

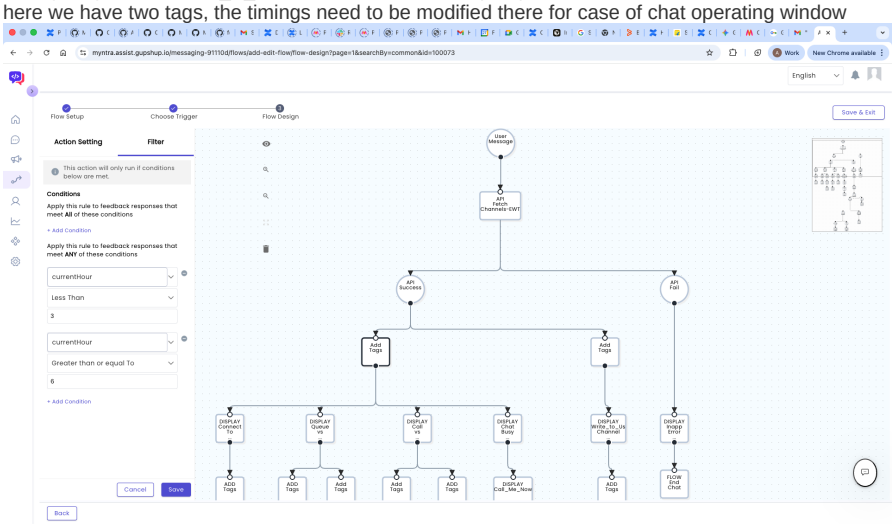
in helpcenter backend switch (helpcenter)

myntra_callNow_enabledTimeWindow used in precondition check in average waiting time, this has three value

a. {
"2025-05-31 07:00": "07-03",
"2025-06-01 07:00": "07-02",
"default": "07-02"
} => here the first value is showing that till 2025-05-31 07:00, the time window for chat will be 07-03, from 2025-05-31 07:00 till 2025-06-01 07:00 the timings will be 07-02, and post that it will stay on 07-02

the same is also the case for myntra_chat_enabledTimeWindow

In Gupshup, in Common_S_multiChannelConnectV4 (Live)
here we have two tags, the timings need to be modified there for case of chat operating window



Technical Reference: The "Fixer" Commands

Tasky

Airflow DAG for Bulk Update and Report Download

> *Note:-*
>
> 1. *Use the DAG links to check the status of a jobID that is stuck on Tasky*
> 2. *The UIDX in the below 3 curls must be the one that you see on the Tasky Portal. It can be different from your myntra one.*

Bulk Task Update:- https://platform-airflow.myntra.com/dags/tasky-bulk-task-update/grid

Report Download:- https://platform-airflow.myntra.com/dags/tasky-report-download/grid

Curl to trigger the bulk task update DAG

Below curl triggers the bulk task update DAG for tasky but Tasky doesnt trigger it directly. Tasky sends the excel file to thanos which uploads it to blob and creates a filePath to fill in the payload.
Tasky Thanos Airflow

To Fetch the status of triggered jobs Tasky directly hits Airflow.

taskyBulkTaskUpdate

```
curl --location 'http://mwsairflow.myntra.com/mwsairflow-service/workflow-service/job/submit' \
--header 'Accept: application/json' \
--header 'Content-Type: application/json' \
--data '{
    "application": "TASKY",
    "workflowId": "tasky-bulk-task-update",
    "requestPayload": {
        "filePath": "<blob link>",
        "createdBy": "<uidx>",
        "uidx": "<uidx>"
    },
    "qualifier": "bulk_task_update_test",
    "createdBy": "<uidx>"
}'
```

Curl to trigger report download DAG

taskyReportDownload

```
curl --location 'http://mwsairflow.myntra.com/mwsairflow-service/workflow-service/job/submit' \
  --header 'Accept: application/json' \
  --header 'Content-Type: application/json' \
  --data-raw '{
    "application": "TASKY",
    "workflowId": "tasky-report-download",
    "requestPayload": {
        "appClient": "TASKY",
        "reportName": "others_2",
        "tenantIdList": [2297],
        "data": null,
        "createdBy": "c463a768.778e.49ba.8a08.8858f5b37092W01RgId9S7",
        "uidx": "c463a768.778e.49ba.8a08.8858f5b37092W01RgId9S7"
    },
    "qualifier": "others_2_report_download",
    "createdBy": "c463a768.778e.49ba.8a08.8858f5b37092W01RgId9S7",
    "fileAttachments": []
}'
```

Curl to fetch list and details/status of jobs for uidx and dagId

getWorkflowByUserAndWorkflowId

```
curl --location --request GET 'http://mwsairflow.myntra.com/mwsairflow-service/workflow-service
/getWorkflowByUserAndWorkflowId?createdBy=c463a768.778e.49ba.8a08.8858f5b37092W01RgId9S7&workflowId=tasky-
report-download&start=0&fetchSize=10' \
--header 'Accept: application/json' \
--header 'Authorization: Basic dGVzdDp0ZXN0' \
--header 'Content-Type: application/json'
```

Thanos: Fix Missing Task Data

> *Use this to re-pull data for a specific Task ID.*

Bash

```
curl --location 'http://thanos.myntra.com/myntra-thanos-service/platform/incident/enrichment/reperform?
tenantId=2297' \
--header 'content-type: application/json' \
--data '["INSERT_TASK_ID_HERE"]'
```

Hermes: Template Onboarding

> *Steps required for different types of communications templates*

Email

https://confluence.myntracorp.com/display/engg/Onboarding+email+for+an+event
https://drive.google.com/file/d/1viHdgfjJ4q1sI_eR5Ot-NZuMAh6kSpVY/view

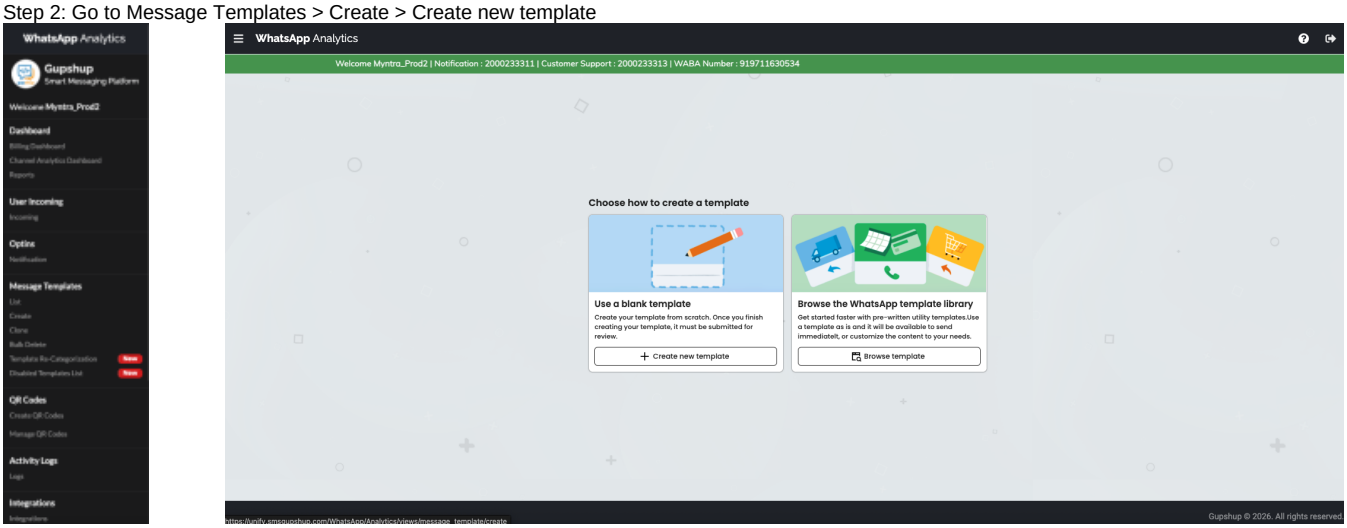
WhatsApp

The templates need to be onboarded to Hermes DB as Velocity templates similar to how it is done for Email.
Entries need to be made to *template_details* and *template_additional_info* tables for sync, and for async entries need to be made in *notification_event_channel_config* and *notification_event_config* as well.

There is one additional step that needs to be done for WhatsApp, i.e. the templates need to be onboarded on the gupshup portal as well.

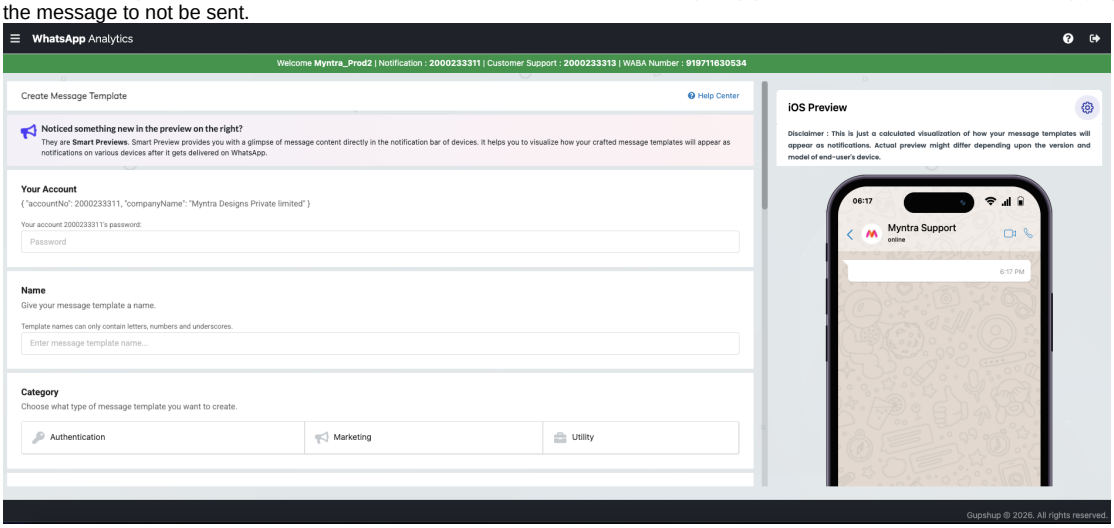
Step 1: log into Gupshup template portal:- https://unify.smsgupshup.com/WhatsApp/Analytics/ . for login creds reach out to CRM team

Step 2: Go to Message Templates > Create > Create new template



Step 3: You will require another password at the top of this page, it will be different from log in password

Step 4: Select your relevant template type (utility/marketing/authentication), choose utility for CX and seller communications, and enter your template details. If you use action buttons you will have to have a CTA row in the *template_additional_info* table.
Note:- The template name and details must be identical in Hermes DB and Gupshup portal, even the difference of an empty space or line break will cause the message to not be sent.



Step 5: Add some sample values if using dynamic fields, and save the template

Step 6: The template content will be reviewed by Gupshup team against Meta's guidelines. Once it says enabled, then it is ready to be used.

Template Id	Template Name	Body	Type	Category	Button Type	Quality Rating	Language	Status	Last Updated On	Actions
8359399	out_for_delivery_obd_hl	Your order {{1}} will be ...	TEXT	Utility	NONE	Unknown	English	Enabled	2026-02-10 17:32:51	

Nurix Voicebot: Request to download all recordings

Product or ops can request to share call recordings from ubona. We have a script to pass the call Ids as an array and it will hit the Ubona API to get the call recordings.
The script can be run from your local IDEs.
Step 1:- Get the Ubona Auth token

Ubona Auth Token API

```
curl --location 'https://auth.ubona.com/auth/oauth2/token' \
--header 'Content-Type: application/x-www-form-urlencoded' \
--header 'Authorization: Basic bXludHJhX2liOlYjdTUmSHcxVHBYWnNAZVE4Y0IhZk5MN2c2a09KbVJE' \
--data-urlencode 'grant_type=client_credentials' \
--data-urlencode 'scope=API'
{"access_token":"eyJraWQiOiI1OTIzNDYyNC05ZjNlLTRlMzgtODEwYy0wNWI0YWE3YjE1ZGMiLCJhbGciOiJSUzI1NiJ9.
eyJzdWIiOiJteW50cmFfaWIiLCJyb2xlcyI6WyJBRE1JTiJdLCJpc3MiOiJodHRwczovL2F1dGgudWJvbmEuY29tIiwiY2xpZW50X2lkIjoibXlu
